

Community Building Rescue

Volunteers Needed

It's best to work as a community rather than on your own, then you can do things like move a whole building. Rijanna aged 8 years

The Story So Far

Oasis is undertaking an exciting project to rescue and reuse a pioneering bolt-together, Walter Segal building. The building otherwise destined for landfill has been completely dismantled and moved three miles.

Re-modelled and refreshed it is being re-built at Oasis. We need help from volunteers, no previous construction experience is required. Come and help, meet new people and develop and extend your skills.
